128 Clinton Park

San Francisco CA 94103

phone: 415.971.8063

experience

University of California: College of Environmental Design
Graduate Student Instructor

Berkeley, CA
Spring 2008

Instructed an introduction to architecture course for undergraduates. Course started with analysis of film, translating analysis skills into research and diagramming of buildings. Concluded in design development of a large film school and archive in Golden Gate Park.

University of California: Engineering Department
Graduate Student Instructor

Berkeley, CA
Fall 2007-Fall 2008

Instructed a lab-focused web design and development. Projects focused on html and javascript, as well as, ensured competence in Microsoft Office and Adobe Suite Programs.

Sasaki Associates
Junior Designer

San Francisco, CA
Summer 2007

Collaborated with landscape architects and urban designers on a large scale park facility for the Port of Los Angeles. Developed design of two pavilions to house rest rooms, pump rooms and other facilities to serve the new park.

Carrier Johnson
Graphic Designer/Junior Designer

San Diego, CA and Oakland, CA
Fall 2004 - Fall 2006

Developed marketing materials and project graphics for four offices. Focused on instilling a new brand for the company, including development of a new web site and the firm's first published book. Coordinated project graphics to create a cleaner, updated image for the firm as a whole. Developed schematic design of two multi-unit residential projects in the Bay area, using Revit to develop design and graphics.

Machado and Silveti Associates
Assistant to Marketing Director

Boston, MA
Winter - Summer 2004

Developed marketing materials for a medium-sized, international design firm, including developing responses to RFQ's and RFP's; creating interview presentations; schematic design; submittals for awards; creating portfolios for potential clients; design proposals and summaries for clients.

Lee Kennedy Company
Assistant to Director of Preconstruction

Boston, MA
Summer 2003

Worked with subcontractors to inform developers and designers about the constructability, site analysis, scheduling impacts, and construction costs of projects in preconstruction and construction stages.
